

Innovative Equipment Option

SideKick™

Reduce downtime and operator intervention

The patented SideKick secondary film carriage is designed to automatically rotate into the primary wrapping position when the stretch film is depleted or inadvertently breaks. By installing a SideKick into your production line, you can improve productivity

and reduce downtime from operator intervention by up to 50%.

The SideKick, easy to install and requiring no additional floor space, can be retrofitted to most new and existing Octopus stretch wrappers.

- Reduce film roll changeover time
- Improve productivity by keeping your stretch wrapper up and running
- Decrease downtime by minimizing operator intervention

Signode combines innovative equipment and high quality stretch film with superior service to provide you with a single source solution for all of your stretch packaging needs.
